I would defer to CI on the strategy to accomplish the objective.

The management objective is to make sure the community is informed about what we plan to do and what they will be seeing in their neighborhood once we move in. You, Jason and David can figure out the tactics and strategy.

Thanks, Dan

I don't think a public meeting would be a good idea right now at this site. The affected community outreach should just be a factsheet and door to door, along with other things outlined in the communications plan. We are hoping to start work soon, and planning a public meeting would not be as beneficial as direct communication. We are very fortunate to have collected so

much information on the affected residents, different from other sites, it puts us at a better position to be able to speak to residents carefully & individually.

Thanks, Dan.

If someone can send me the draft factsheet before its final that would be great. I think a public meeting ahead of the work would be a good idea is we can make that work. If not, then we can think of another approach, but need to make sure we are notifying the residents before anyone is mobilized to the site.

Alejandro, hopefully you and I can chat a bit today.

Thanks!

Nahal

Subject: Fruitland Magnesium Fire Site

Enrique signed the action memo for the Fruitland Magnesium Fire Site on 28 September.

The AM raised the removal ceiling from \$1,620,000 to \$3,960,000.

Jason and Alejandro – a reminder that I would like communication with the surrounding residents, ideally an in person meeting of some kind but at a minimum some kind of flyer in English and Spanish, before we mob to the site.

Thanks, Dan
